Only Pioneer can provide the freshest water for you and your family

AQUALINER® FRESH

- Layer 1. White Metallocene Polyethylene Film
- Layer 2. Propriety co-extrusion of Thermoplastic Olefins (TPO's) and Metallocene Technology
- Layer 3. Weave: High tenacity multifilament Polypropylene
- Layer 4. Propriety co extrusion of Thermoplastic Olefins (TPO's) and Metallocene technology
- Layer 5. Black Metallocene Polyethylene film embedded with Santized® technology

- ▶ **Water Stays Fresher for Longer**
Antimicrobial technology is a defence to the liner which helps prevent microbe growth
- ▶ **NSF-61 Certified for Drinking Water**
The AQUALINER® Fresh is third party NSF 61 certified for drinking water storage.

- ▶ **Better Quality Water and Less Cleaning**
Antimicrobial technology requires less frequent cleaning to maintain a healthy tank environment.
- ▶ **Longer Tank Life**
Prevent mold, algae and bacteria that causes damage for an overall longer tank liner life.
